commehr

commehr AntiSpam Service

commehr AntiSpam Service is a solution for external virus and spam protection, independent of the underlying e-mail system. All e-mails undergo dual anti-virus and anti-spam protection to protect businesses from security threats.

Your advantages

With the product commehr AntiSpam Service you benefit from the following advantages:

- Eliminates over 99.97% of spam, viruses, malware and other threats
- White & blacklisting, adjustable per user or domain
- Double virus scan for each e-mail
- System hosted in Germany, the e-mails never leave Germany
- Daily quarantine report with all rejected e-mails

It is inclusive

As a customer, you do not have to worry about anything. The following services are included:

- Software, hardware and data line for operating the AntiSpam server
- Service for AntiSpam server operation
- Permanent upgrades, security patches and monitoring
- Setup and configuration of customer domains (quantity according to order)
- DNS customization if there is direct access to the customer's DNS system

Functioning

Internet → commehr AntiSpam → E-mail server → End users

Spam & virus !!!
